## PRO BASS

35 WATTS TRUE OUTPUT

(OVER 70 WATTS PEAK POWER)

\$187.50

The mighty 15" Maximum Performance speaker has commanding presence with three controls: volume, treble and bass. With a three jack input, this amp is powered for 5 tube performance plus 4 silicon diodes to keep it on the cool side. Line reverse switch with pilot light, eliminates hum from improperly polarized AC line. Cabinet: length 19", height 27 1/2", depth 9 1/2". Weight: 39 lbs.

6157

## SUPER BASS PIGGYBACK

\$350.00

70 WATTS TRUE OUTPUT

(OVER 150 WATTS PEAK POWER)

Now booming bass sound from special separate enclosure. The Gretsch Super Bass Piggyback has two 12" Maximum Performance speakers in the acoustically correct cabinet. Separate power chassis has three instrument inputs. Individual controls for volume and tone, plus a tone range selector for guitar, high and low bass. 8 tube performance plus 4 silicon diodes. Tube-saving standby switch with pilot light. Polarity rectifying line reversing and on/off switch with pilot. Removable 4 amp fuse. Amplifier cabinet: length 26 1/2", height 9 1/2", depth 9 1/2". Weight: 30 lbs. Speaker enclosure: length 32 1/8", height 20", depth 11 1/4". Weight: 45 lbs.

*This amplifier suitable for band instrument amplification.*
